# FOREWORD

**M**any years of experience and our passion for camping characterise the innovative products from Westfield TQC.

Our aim is to provide high-quality and functional products that offer high utility value in everyday camping life. Our constantly growing product range of tents and furniture is characterised by high-quality materials and the best features. For example, our patented **AAS-Air-System®** is used in all awnings.

This saves a lot of time during assembly and dismantling.

To make it easier for you to find the right awning for

your travel behaviour, we have divided our products into three series with different focal points in terms of material and features.

- The **PREMIUM PLUS-SERIES** stands for the best materials, development and production that we have to offer 'made in Europe'.
- The **PREMIUM-SERIES** is characterised by innovative materials and numerous detailed solutions.
- In the **PREMIUM-LIGHT-SERIES**, the focus is on high-quality, lightweight materials.
- The **TRAVEL-SMART-SERIES** for compact awnings combines lightweight materials with quick assembly.

**CONNECTION OF THE  
AIR PUMP**

The air awning can be inflated at this connection using either the electric pump or the hand pump. This connection is also used to deflate the tent when it is taken down. For high stability, all our air awnings should be inflated to 7 PSI.

**THE AAS-  
CONNECTION SYSTEM**

The individual air chambers are all connected to each other. This makes it possible to inflate the entire tent via a central valve.

**THE AAS-CONNECTION-  
COVER PANEL**

The cover flap covers the inflation point of the Air System.

# FEATURES

THE ADVANCED AIR SYSTEM<sup>®</sup> of our Series **PREMIUM PLUS**, **PREMIUM** and **PREMIUM LIGHT**.

The patented Advanced Air System<sup>®</sup> air technology from WESTFIELD TQC makes it possible to combine the individual air chambers of the air awning into a frame with very high stability. A major advantage: the frame, consisting of three-layer air tubes, is inflated via a central valve. This guarantees extremely easy handling and quick assembly and dismantling.

Advanced Air System<sup>®</sup> (AAS)

Completely at  
only **ONE** point  
inflatable  
(AAS)!

You can find  
more informa-  
tion on our  
YouTube  
video:

## High ventilation

Our standard high-ventilation system enables the constant air circulation required in your awning. It should remain permanently open.

For further information  
in our  
YouTube video:

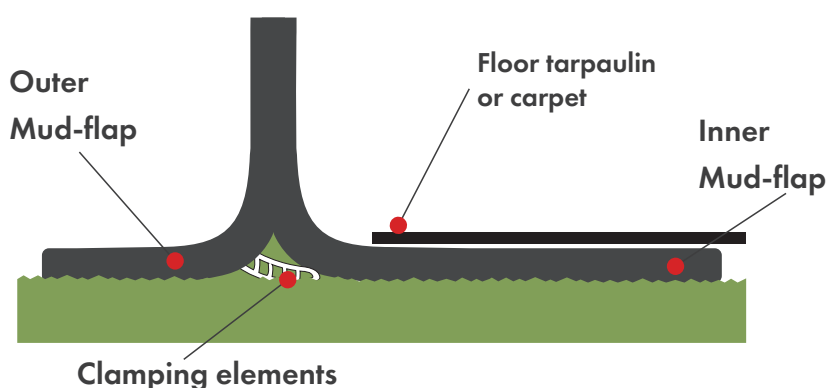

## Wind skirt + wheel cover

Our GALAXY 2.0, PLUTO 2.0, PLUTO XL 2.0, CERES, VEGA 2.0, LYNX and DORADO XL caravan air awnings include a floor skirt that prevents unpleasant air from flowing under the caravan into the awning. The GALAXY 2.0, PLUTO 2.0 and PLUTO XL 2.0 air awnings are equipped with a ventilation system.

## Double mud flat

The tents in the **PREMIUM** and **PREMIUM PLUS-SERIES** are equipped with a double mud flat. One strip is placed on the inside and one on the outside. This ensures that the interior and tensioning elements are perfectly protected.

Further information can be found  
in our YouTube video:

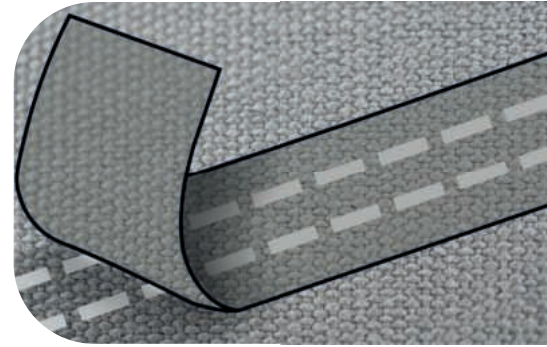

## Taped seams

All the seams of our tents are also taped from the inside. This guarantees seams watertightness and keeps the inside of the tent dry.

## Vario corners

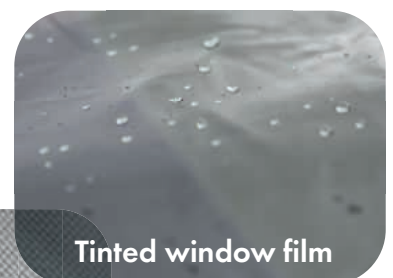

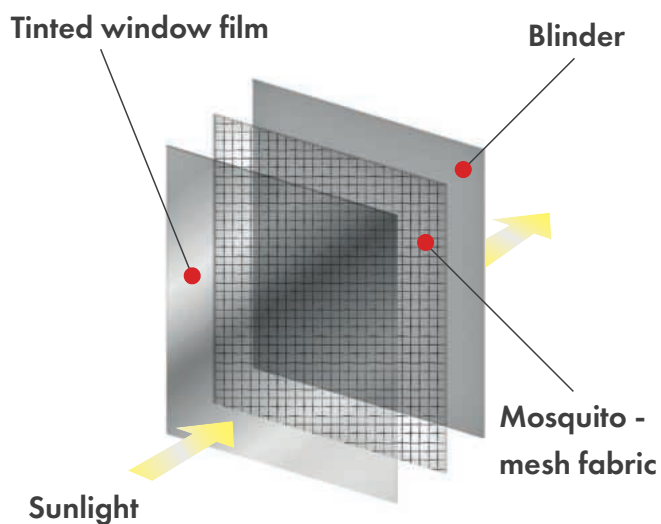

The Vario corners on the left and right of our GALAXY 2.0, PLUTO 2.0, PLUTO XL 2.0 and CERES caravan air awnings enable a perfect connection to the caravan.

More information on our YouTube video. 

## 3-layer window elements

The awnings in our **PREMIUM-PLUS**, **PREMIUM** and **PREMIUM-LIGHT-SERIES** are always equipped with window elements made of tinted window film. We use clear window film for the Travel Smart series. Our mesh elements are made of black mesh fabric. The windows can be closed with our privacy screen blinds.

## PREMIUM PLUS SERIES

The air awnings in our **PREMIUM PLUS-SERIES** are the most innovative top-of-the-range products that WESTFIELD TQC has to offer. The products in this series are manufactured in Germany from materials sourced mainly from Europe, e.g.

from the top supplier TenCate. In the **PREMIUM PLUS-SERIES**, we utilise all our experience and know-how to offer you products that top everything in the Premium series.

# MATERIAL PREMIUM PLUS

## ALL SEASONS MATERIALS:

The materials of our **PREMIUM PLUS-SERIES**.

The many advantages of Tencate's robust All Season

material are utilised for the first time in the roof of our new Galaxy 2.0 air awning. The 100% polyester fabric is treated with a high-quality acrylic coating and is characterised by its special dirt-repellent features and extreme weather resistance. This makes it extremely easy to clean and at the same time waterproof and windproof. Another advantage: the high-quality Tencate All Season fabric is very light, UV-resistant and retains its colour and shape for a very long time.

For the first time in this **PRE-**

**MIUM PLUS GALAXY 2.0**, the Airtex Classic fabric is also used for the side walls of our air awning.

The lightweight material consists of 100% polyester, is acrylic-coated and impregnated on one side. This coating gives the fabric a particularly textile character, is dirt and water repellent and has an antimicrobial effect. Airtex Classic is UV and weather resistant and also protects against sunlight.

# GALAXY 2.0

The **GALAXY 2.0** is the top-class air awning in the WESTFIELD TQC range. The TOP awning, **Made in Germany**, with fabrics from the European manufacturers TenCate® and Mehler AIRTEX® is suitable for use over several months. The design and modern shape of the air awning convey a very high-quality impression. The 2024 Series 2.0 awning offers even more comfort thanks to the air tubes in the canopy. This makes pitching even easier and quicker.

The large windows that can be closed from the inside, the depth of 250 cm and the standing height in the awning create a very pleasant feeling of space. The breathable materials and the many ventilation options ensure an optimum indoor climate in all weathers. With the top features of the **GALAXY 2.0** air awning, you can enjoy your holiday right from the start and really enjoy the space in your caravan.

# LUNA PLUS

**T**he **LUNA PLUS** is a fully retractable bag awning that can be easily converted into a fully retractable awning.

It can be erected in a very short time as the outer roof and pitching poles are integrated into the profile. The poles are telescopic and equipped with a tripod spring.

The profile is rolled out of the bag, which is very strong and stable, which in turn gives the tent more stability.

The tent comes fully equipped, which is why it can be used anywhere straight from the factory without the need to purchase additional items.

**LUNA PLUS** is the perfect choice for every caravan owner.

Thanks to the special roof cut, the **LUNA PLUS** fits perfectly to any type of caravan.

It can be set up in just a few minutes and is ready for immediate use.

# PREMIUM SERIES

**T**he **PREMIUM-SERIES** air awnings from Westfield TQC are characterised by a combination of the best materials and extremely user-friendly features. Thanks to the unique AAS-Systems®, with which the air awning is inflated at a single point, the air awning can be set up quickly and easily. The

materials used, such as the Hydrotech® Cotton-Touch-Tent material and the construction with 'three-layer' air tubes, guarantee long-term, comfortable use.

# MATERIAL PREMIUM

## HYDROTECH COTTON TOUCH, the material of our **PREMIUM-SERIES**.

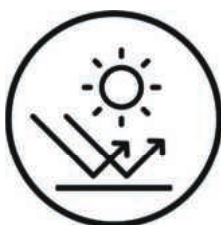

HydroTech® CottonTouch is the premium material in our range. The high-performance fabric, specially developed for use and requirements in the caravaning sector, has a very high life expectancy and is reserved for the **PREMIUM-SERIES**. The yarn dyed material is coated both outside and inside with UV-resistant polyurethane. It offers a very high-quality feel, meanwhile is extremely easy to care for and achieves a very high water column thanks to the special weave. The yarn-dyed fabric guarantees colour fastness for years, is water-repellent and repels dirt and moisture better than conventional fabrics. Compared to cotton blend fabrics, our HydroTech® Cotton Touch material impresses with maximum dimensional stability under changing weather and temperature conditions.

## FEATURES

- ROBUST MATERIAL WITH A LOW SURFACE WEIGHT OF 200 G/M<sup>2</sup>
- OPTIMUM AND EFFECTIVE UV PROTECTION

# PLUTO 2.0

**T**he **PLUTO 2.0** model impresses with its new, modern colour scheme. Thanks to the **AAS-Air-Technology®**, the AAS **PLUTO 2.0** air awning is super quick and easy to set up. The awning was converted to air tube when the model was changed so that it can be set up even more quickly. The awning is fully inserted beading rail and provides a perfect seal against wind and weather at the sides. All windows, doors and service flaps of the caravan can be opened smoothly/without obstacles.

The high quality **HydroTech® CottonTouch** material, the permanent ventilation and the tinted windows create a very pleasant indoor climate at any time of the year. The front and side walls are fitted with mosquito nets and can be removed without barriers if required. The large panoramic windows offer a perfect view and optimum lighting conditions in the air awning. You can expect an unrestricted panoramic feeling with the Premium air awning.

## FEATURES

### **new** MAGNET MESH DOORS

SUITABLE FOR:

- PLUTO
- PLUTO XL
- PLUTO 2.0 AND
- PLUTO 2.0 XL

# PLUTO XL 2.0

With a large tent depth of 300 cm, the **PLUTO XL 2.0** offers an XL feeling of space. Despite its size, setting up the premium air awning is quick and easy with the help of **AAS-Air-Technology®**. The canopy is also equipped with air tubes. This means that the awning requires no poles at all. At the side, fully enclosed structure ensures perfect seal against unpleasant draughts. Another advantage of the full retraction: all windows, doors and service doors of the

caravan can be opened smoothly/without obstacles. The high-quality **HydroTech® CottonTouch** material of the awning has an attractive modern colour scheme. Permanent ventilation and tinted windows create a very pleasant indoor climate in the spacious vestibule at any time of year. The front and side walls can be removed as required and are fitted with mosquito nets. The large window fronts ensure optimum lighting conditions and allow a magnificent view of the surroundings from every seat.

- PLUTO XL
- PLUTO 2.0 AND
- PLUTO 2.0 XL

# VEGA 2.0

Illustration:  
VEGA 2.0 for caravans

The **VEGA 2.0** air awning for caravans or motorhomes is the perfect choice for anyone who travels a lot and often changes location. It is easy to set up and take down again at the pitch. Thanks to its depth of 250 cm, the air awning offers plenty of space inside. The air tubes are designed in such a way that standing height is achieved throughout the air

awning and optimum utilisation of space is guaranteed. The front and side walls are fitted with mosquito nets, guaranteeing protection from annoying insects. In combination with the large panoramic windows, this creates a feeling of spaciousness that makes every day of your outdoor holiday perfect.

# NEPTUNE 2.0

The extra-high **NEPTUNE 2.0** is an air awning specially developed for motorhomes. There is a choice of four different connectors that can be combined with **NEPTUNE 2.0**. This allows connection heights of 250-330 cm. A special feature of this air awning is the extra high roof, which makes it possible to open

the vehicle door without any obstacles. The **NEPTUNE 2.0** is equipped with large panoramic windows. The front wall can be removed if required. The two side walls equipped with mosquito netting can be folded down or removed completely as required.

### DRIVE AWAY ADPAPTER SET

ART.-NR.12010301905000

We recommend our optionally available Drive Away ADAPTER set, as it makes use more convenient.

32,95 € (RRP)

## WITH DRIVE-AWAY-FUNCTION

**OUR NEPTUNE/ NEPTUNE 2.0/HYDRA, TRITON, ORION, ORION 2.0, AQUILA PRO and ZODIAC models have a DRIVE-AWAY-FUNCTION. The rear wall of the awnings is included.**

A Drive-Away-Function is a detachable connection between your vehicle and your awning, which is created using double beading and a plastic rail.

This requires the beading rail of an awning or a standard piping rail. The rear wall of the awning can be closed while you are away.

# ORION 2.0

The **ORION 2.0** air awning is designed for vehicles with a pitch height of 190-270 cm. The functional airlock, available in three sizes, connects the free-standing **ORION 2.0** to the vehicle. The airlock is attached to the tent via a zipper and to the vehicle via a beading. Alternatively, an airlock pole can be used or the airlock can be tensioned over the vehicle using

guy ropes. There are two entrance doors in the airlock that provide direct access to the vehicle. The **ORION 2.0** is equipped with large panoramic windows, a door in the front wall and two side walls with mosquito nets. The side panels, front and rear walls, can be completely removed. The side panels can also be folded down if required.

The **KARI** sun awning is ideal for campers who are travelling with their caravan and want suitable sun protection. It is made of high-quality **HydroTech® CottonTouch** material and is held in place by a stable air tube system.

The **KARI** offers possibilities that go far beyond a simple sun canopy. For a quick set-up, the system is simply filled with air from just one point: The

premium sun canopy can be set up in just under 10 minutes.

The **KARI** can be optionally supplemented with two side walls with a front wall made of mesh or, as a new option, with a front wall made of PVC panels. The windows of the side walls can be closed with window flaps for more privacy.

# ERIS PREMIUM

**T**he **ERIS PREMIUM** living space extension provides a whole new sense of space in the awning! Whether sleeping, kitchen or storage tent, the **ERIS PREMIUM** offers a wide range of options. A door and all-round tinted windows with a privacy function provide optimum lighting conditions and a perfect view through or out. The poles included in the scope of delivery provide optimum tension in the roof and

the standing height of 180-195 cm leaves nothing to be desired. The living area extension can be individually attached on the right or left, allowing a very high degree of flexibility in the parking space. Thanks to a double zip, the existing side wall of your air awning can be used as a partition or room divider. The successful design ensures quick and easy set-up so that your holiday can begin quickly.

# FEATURES

## PREMIUM LIGHT SERIES

The **PREMIUM LIGHT SERIES** air awnings from Westfield TQC are characterized by the combination of robust but lightweight materials and extremely user-friendly features.

The tent fabrics are also made of Hydrotech® RipStop and the air tubes only need to be inflated at one point. The lightweight travel awnings are ideal for frequent changes of location.

# MATERIAL PREMIUM LIGHT

## HYDROTECH RIPSTOP, the material of our **PREMIUM LIGHT SERIES**

The HydroTech® Ripstop was specially developed by us for use in travel awnings. The innovative material is woven using a special process, making it particularly tear-resistant and giving it a charming "box structure". An additional polyurethane coating gives the yarn dyed a tangible soft-touch character and very high UV resistance. The fabric is characterized by a very good weight/stability ratio and its high tear resistance. Another advantage: yarn dyed ensure that the tent fabric retains its color and shape for a long time. Awnings made yarn dyed HydroTech® Ripstop therefore have a very long life expectancy.

## FEATURES

- LOW BASE WEIGHT (165 G/M<sup>2</sup>) WITH VERY HIGH STABILITY
- PARTICULARLY GOOD TREAT RESISTANCE
- HIGH COLOR FASTNESS IN CHANGING LIGHT AND WEATHER CONDITIONS
- VERY HIGH UV RESISTANCE
- WATER AND DIRT REPELLENT
- EXTREMELY EASY TO CLEAN

# CERES

The **CERES** air awning with its modern, rounded shape leaves nothing to be desired. With a depth of 265 cm, it offers an ideal feeling of space. Thanks to the fully enclosed structure in the caravan's beading rail, access to all windows, doors and service flaps is guaranteed. The **HydroTech® Ripstop material**, the permanent ventilation and the tinted windows ensure a pleasant indoor climate even on very hot summer days. The removable front walls with tinted window film and the side walls with mosquito nets can be used as required. We offer optional mosquito elements for the front walls. Large panoramic windows ensure optimum lighting condi-

tions and a perfect view. With a standing height of approx. 185 cm in the front area, the space in the living area can be used optimally. Thanks to the integrated **AAS-Systems®**, the air awning can be set up quickly and easily. The 2023 model of the **CERES** air awning is also equipped with a connection for our **CANOPY SHADY PRO** canopy and is now available in two additional sizes. Enjoy relaxed vacations right from the start with the **CERES** air awning.

# MARS

The **MARS**, with an awning with depth of 250cm, offers a generous amount of space and enough room for camping chairs, a table and there is attractive free space. Experience a perfect ratio of height and width. Equipped with the **HydroTech® Ripstop** material, the **MARS** air awning offers you more than just a reliable travel companion for your van. Thanks to the innovative **AAS-Air-System®**, the tent is simple and self-explanatory to set up in a very short time. The **MARS** also scores highly in terms of equipment with many well thought-out details.

The removable side walls are each equipped with a window and a door with mosquito net - the extra-large windows with slightly tinted film allow plenty of light into the awning, while covers protect against prying eyes. For even more space, the **MARS** can be extended with the **ERIS** extension.

## FEATURES

### Air awning **MARS**

By ground breaking the air tubes, we have found a development solution that allows the sliding door to be opened and closed without any obstacles.

# AQUILA PRO

The freestanding **AQUILA PRO** air tent offers plenty of additional space and many options for coach and tent campers. The built-in **AAS-System®** ensures very quick assembly and dismantling. For maximum flexibility, the connector and the optional sun roof can be attached on the right or left. The front wall is also variable and can be used in two different positions. The **AQUILA PRO** air awning also cuts a fine figure as a stand-alone family tent. Thanks to the overall length of 550 cm, width of 320 cm and height of 215

cm, a very large interior space is created that can be used in a variety of ways. The **AQUILA PRO** air awning is equipped with our high-quality **HydroTech® Ripstop material**. A groundsheet is optionally available. Whether for extra sleeping berths or as a large (awning) tent: the **AQUILA PRO** offers many options. Thanks to the side connection to the vehicle, the space required on the pitch is very manageable.

# TRITON

The freestanding **TRITON** pavilion air tent offers a traditional shape with many possible applications. With the optionally available connectors, the TRITON can be used for many different connectors, caravans or as a stand-alone family tent. Four side walls with tinted windows and blackouts are included in the scope of delivery. Two walls also have a mesh fabric for ventilation. Thanks to the dimensions of 300 x 300 cm and a gable height of 235 cm, there is a very pleasant feeling of space and the tent offers sufficient headroom. A groundsheet is inclu-

ded to keep the tent clean. All four side walls can be removed if required. This turns the air tent into a practical pavilion in no time at all. TRITON is equipped with the high-quality HydroTech® Ripstop material. Thanks to the integrated **AAS-System®**, the tent is super quick and easy to pitch. The **TRITON** air awning is available in three different sizes and even fits on vans or small caravans.

# ZODIAC

The **ZODIAC** air awning is suitable for vehicles with a pitch height of 180-270 cm. The functional airlock, available in three sizes, connects the free-standing **ZODIAC** air awning to the vehicle.

The connector is attached to the tent using a zip and to the connector using a beading. Alternatively, an airlock pole can be used or

the airlock can be tensioned over the vehicle using guy ropes.

The **ZODIAC** is equipped with large panoramic windows, a door in the front wall and two side walls with mosquito nets. The side panels can be folded down or removed if required.

## TRAVEL SMART SERIES

**T**he air awnings in the **TRAVEL-SMART SERIES** from Westfield TQC are characterised by the series of extremely lightweight materials and quick assembly. The three-layer air tubes are quickly inflated using the double lift pump with pressure relief valve included in the scope of

delivery. The low weight and simple construction make the awnings in the Travel Smart series particularly suitable for short breaks, weekend trips and holidays with frequent changes of location.

AIR ERCECT System<sup>®</sup> the technology  
of our **TRAVEL SMART** SERIE.

The Westfield 'Air Erect System<sup>®</sup>' (AES) technology guarantees extremely easy handling and very high stability thanks to the improved, three-layer Airtubes. Thanks to the Airtube system, the air chambers are inflated in a very short time, which enables quick assembly and dismantling.

## HYDRA Dore® SL:

The material of our  
TRAVEL SMART SERIE.

The HydraDore® SL fabric is a 100% polyester fabric with a UV-resistant PU coating on the outside. Thanks to the special coating, this material is very weather-resistant and durable, and the use of a reinforced warp and weft makes the fabric considerably more stable than conventional polyester fabrics. HydraDore® SL is characterised by its high UV resistance and above-average stability.

### FEATURES

# HYDRA

**T**hanks to the modified front air tube shape of our **HYDRA** air awning, we achieve full utilisation of the floor space and optimum standing height in the entire roof area. The removable connector ensures easy assembly and dismantling. Another advantage is the low weight of the tent. The ventilation flaps under the windows provide perfect ventilation for the **HYDRA** van awning. Thanks

to the Air-Erect system, the two air chambers are inflated in a short space of time, making it quick to pitch and take down. The groundsheet included in the scope of delivery can be attached to the tent using Velcro to keep the tent and vehicle clean.

# WINDSHIELD PRO

The **WINDSHIELD PRO** has a unique frame system that is extremely easy to set up. As the telescopic poles are only on the outside, you have considerably

more interior space and avoid tripping hazards. Additional extensions can be easily attached using a beading system.

# ORGANIZER

**new**

## STORAGE

In material and color  
suitable for  
**SERIES PREMIUM.**

### 3 MOUNTING VARIANTS

for all three  
Organizer possible.

**R**ecreational vehicles have limited space. That's why we have now developed flexible, well-organised storage solutions that make it easy to find a fixed place for items inside or outside the vehicle. Our clever organisers are made from Cotton Touch, with the same robust material features as our awnings.

#### The organisers offer various annex options:

By adjustable strap system on the vehicle seat, with loops on a frame or by adapter in the beading. There are also sturdy eyelets in the reinforced back wall for attaching the organisers to hooks. The organisers are available in three different versions.

### ORGANIZER CHUNKY

**Item no.:** 1207 00000 20000

**Weight:** 1,5 kg

**Load capacity:** ca. 8kg

**59,95 € (RRP)**

The extra-wide multi functional organiser **CHUNKY** holds medium to large objects and can be closed with a cover using a 2-way zip. Eight equally sized compartments and one large one provide sufficient storage space for everything that needs to be quickly to hand in everyday camping life. Three extra mesh compartments in the cover and two on the side of the organiser can also hold smaller items.

## ORGANIZER MAGNET

The large organiser has a total height of 81 cm and offers plenty of storage space with its 3 compartments. Each compartment is divided in the centre into compartments measuring 13 x 23 cm. When not in use, the compartments can be easily closed using the integrated magnets and the organiser can be folded away to save space.

**64,95 € (RRP)**

**Item no.:**  
1207 00000 30000

**Weight:** 1,8 kg  
**Load capacity:** ca. 8kg

## ORGANIZER SHOES

Shoes, flip-flops and sandals are neatly stored in ten clearly organised compartments. A cover ensures that nothing falls out when travelling or at the storage location. It can be rolled up and fastened with a toggle fastener. There are additional mesh compartments above the cover and on the side of the organiser for small items.

**Item no.:** 1207 00000 10000  
**Weight:** 1,7 kg  
**Load capacity:** ca. 8kg

**69,95 € (RRP)**

# MODULOR I+II new

## STORAGE

MODULOR I and MODULOR II make a clever camping locker solution with a small pack size, which allows you to equip the contents at home with a removable storage box. At the campsite, the frame of the module is simply unfolded and the box simply attached inside - that's it.

The MODULOR I includes a storage box that can be filled from the top and from the side, and it comes with a detachable table top. Four individually adjustable legs with extra-large foot plates ensure stability.

If more storage space is required, remove the table top and place MODULOR II on top of MODULOR I. Place the table top on MODULOR II and the camping cabinet is extended.

Another advantage of the MODULOR concept: an additional storage box makes it easier to quickly store stuff weighing up to 12 kg at your vacation destination. Simply swap the storage box filled with shopping for one of the bags in MODULOR I or II. All your supplies are then in place.

Combination of Modulor I+II

Dimensions MODULOR I+II:  
Assembled incl. feet: W: 55,5 x H: 90 x D: 40 cm
